PROFESSIONAL SUMMARY

I am a BI and Data Analyst with **17 years of professional experience**, including **15 years at Dubai Duty Free** — the world's largest travel retailer by revenue — where I built and maintained Power BI and Tableau dashboards that supported over **\$2 billion in annual revenue** and reduced manual reporting time by **30%**. My work sits at the intersection of data, operations, and business strategy: I extract insight from complex datasets, turn it into clear visual stories, and help leadership make faster, better decisions.

I hold a **newly awarded MSc in Project Management** (EAE Business School, Barcelona — graduated July 2025) and am completing an MBA, combining academic rigour with hands-on delivery experience. I am fully authorised to work across the EU and am actively seeking **BI Analyst, Data Analyst, Business Analyst, or PMO roles** in Barcelona or remotely across Europe.

CORE SKILLS & TECHNOLOGIES

PROFESSIONAL EXPERIENCE

Back Office Support Specialist & Data Analyst Dubai Duty Free Dubai International Airport, UAE	Sep 2022 – Apr 2025
- Designed, built, and maintained Power BI and Tableau dashboards tracking KPIs across five integrated retail systems — directly supporting over \$2 billion in annual revenue and cutting manual reporting effort by 30%. - Extracted and analysed data from SAP and multiple retail platforms, maintaining accuracy and integrity for an operation serving more than 90 million passengers per year. - Produced daily, weekly, and monthly KPI reports for senior leadership, consistently identifying sales trends, stock anomalies, and operational gaps before they became costly problems. - Partnered with cross-functional teams across finance, logistics, and commercial retail to translate complex business questions into clear, decision-ready data insights. - Built financial forecasting models and variance analysis reports in Advanced Excel and Power BI, enabling proactive budget and performance management. - Developed and automated reporting workflows, freeing business teams from manual data tasks and improving data consistency across departments.	
Operations & Retail Consultant Independent Consultant Yangon, Myanmar	Nov 2020 – Aug 2022
- Designed and delivered Excel-based dashboard and reporting solutions for retail clients, enabling data-driven inventory and financial decisions where none previously existed. - Managed end-to-end P&L reporting, financial tracking, and sales forecasting, giving business owners clear visibility of their performance for the first time.	

- Built inventory management frameworks that improved stock accuracy and reduced shrinkage across multiple retail clients.

Senior Retail Specialist, Team Coach & Shift Secretary

Aug 2008 – Aug 2020

Dubai Duty Free | Dubai International Airport, UAE

- Built a 12-year career at Dubai Duty Free — progressing through **five roles** in luxury fashion and jewellery at the world's number-one travel retailer — demonstrating sustained high performance and institutional trust.
- Used retail management systems and sales data to track category performance, identify stock optimisation opportunities, and coach team KPIs — developing the analytical mindset I now apply as a data analyst.
- **Coached and mentored teams of 8–12 people**, consistently improving individual and group KPI scores across quarterly performance reviews.
- Managed shift operations including cash reconciliation, stock control, and operational reporting — building rigorous data accuracy habits that underpin my work today.

EDUCATION

Master of Business Administration (MBA)

University of the People | Online

2024 – Expected December 2026

Strategy · Financial Management · Organisational Leadership

MSc in Project Management

EAE Business School | Barcelona, Spain

Graduated July 2025 | Ceremony: 15 July 2025, Barcelona

Project Planning · Risk Management · Agile · Stakeholder Engagement

NEWLY GRADUATED — July 2025

KEY ACHIEVEMENTS & PROJECTS

- **\$2B+ revenue environment:** Delivered Power BI and Tableau BI solutions supporting the full commercial operation of Dubai Duty Free — one of the most complex, high-volume retail environments in the world — across a 15-year tenure.
- **30% reduction in reporting time:** Automated dashboard and reporting workflows in Power BI and Advanced Excel, freeing significant analyst and management hours each week.
- **Retail Sales Analysis — Python & EDA:** Independently built an exploratory data analysis project using Python (pandas, matplotlib, seaborn) on 1,000 retail transactions, published on GitHub: github.com/ayethet-07/retail-sales-analysis
- **Live analytics dashboard:** Built and deployed a fully interactive retail KPI dashboard using JavaScript and Chart.js — featuring KPI cards, four chart types, and a filterable product table. Live at: ayethet-07.github.io/ayethetthetkhaing/dashboard.html
- **Portfolio website:** Designed and built a professional portfolio website with a working Formsprees-integrated contact form (HTML, CSS, JavaScript) within the first week of learning web development, demonstrating rapid skill acquisition.
- **Cross-border career progression:** Advanced professionally across Myanmar, UAE, and Spain — always growing in responsibility — while completing postgraduate education simultaneously.
